**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 20-44, drawn to a method for the treatment of hemorrhoids providing an anoscope and a hemorrhoid occlusion device, classified in class 600, subclass 105.
- II. Claims 1-10, drawn to an anoscope for hemorrhoidal surgery, classified in class 600, subclass 114.
- III. Claims 11-19, drawn to a surgical instrument for tissue occlusion, classified in class 606, subclass 110.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II, and Groups I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the anoscope can be used as a separate tool for viewing internal cavities. The subcombination has separate utility such as using the surgical instrument for general tissue occlusion.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
